Office Action Comments	10/556,989	SIBER ET AL.				
Office Action Summary	Examiner	Art Unit				
	Matthew J. Smith	3635				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign mentioned in the description: recess 5 [0008].

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 6, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Jameson et al. (4529976).

Jameson et al. disclose, in Fig. 7, a fire alarm which includes a base 8; a fire alarm insert 1 connected to the base; a covering cap 35 and a sheet 3a located between the covering cap and the fire alarm insert to cover the fire alarm insert; the covering cap detachably connectable with the fire alarm insert of the fire alarm; and the connecting means between the covering cap and the fire alarm insert configured as releasable detent elements.

This reference also discloses an installation set with a fire alarm which includes a base 8; a fire alarm insert 1; and a covering cap 3a detachably connectable to the fire alarm and a sheet 35 which includes replaceable sheets (col. 4, lines 51-55).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 3, 4, 7, 8, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jameson et al.

Jameson et al. disclose the invention substantially as claimed including a fire alarm with a base 8; a fire alarm insert 1 connected to the base; a covering cap 3a and a decorative sheet 35 to cover the fire alarm insert but not the covering cap convex in

shape, the covering cap has a mat finish, at least in some areas, the sheet colored or has a pattern, the sheet colored on both sides or has a pattern on both sides, different colors or patterns being provided for each side of the sheet, or the sheet neutral in color and has a surface structure that can be painted in a common ceiling color.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to cover the decorative sheet 35 instead of the sheet 35 on top of the cover since a reversal of parts would not yield a new or unexpected result.

It would have been further obvious to make the covering cap convex in shape or have a mat finish; the sheet colored, have a pattern, colored on both sides, have a pattern on both sides, different colors, patterns for each side of the sheet, in a neutral color, or have a surface structure that can be painted in a common ceiling color since these modifications are suggested by Jameson et al. (col. 4, lines 51-55), expected, and predictable.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jameson et al. in view of Burek et al. (4167688)

Jameson et al. disclose the invention substantially as claimed but not the covering cap is transparent.

Burek et al. show a fire alarm 24 with a transparent covering cap 34.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to make the Jameson et al. cap transparent, as shown by Burek et al., in order to see the structure behind the cap.

Allowable Subject Matter

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Smith whose telephone number is (571) 272-7034. The examiner can normally be reached on T-Th, 8-3.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard E. Chilcot can be reached on 571-272-6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
